

Using Positive Reinforcement to Teach & Change Behavior Workshop

Monday, February 22, 2021 at 5:30 pm

Presenter:

Danica R. Savoie M. Ed., LBA, BCBA

Join us for a free webinar workshop!

Positive reinforcement is the hallmark principle of Applied Behavior Analysis (ABA). We use positive reinforcement to teach new skills and increase skills your child can already do. Positive reinforcement for good behaviors increases the odds that more good behaviors will happen in the future.

This webinar will discuss how to incorporate positive reinforcement into your daily routine and discuss some tactics that may be helpful when teaching a new behavior or changing and redirecting a behavior.
